

K_AIR

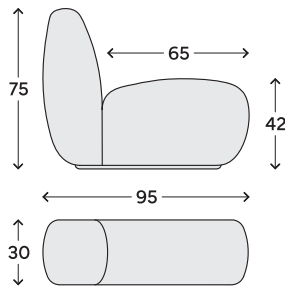

K_AIR è un sistema modulare che ridefinisce il concetto di imbottito attraverso leggerezza e libertà compositiva. Elementi rettilinei e curvi, concavi e convessi, permettono configurazioni infinite, da composizioni lineari a forme fluide e continue. La struttura portante, realizzata in stampa 3D e integrata all'interno dell'imbottito, rende ogni modulo leggero, maneggevole e facilmente riconfigurabile.

K_AIR is a modular system that redefines upholstered furniture through lightness and compositional freedom. Linear and curved elements, both concave and convex, allow infinite configurations, from straight layouts to fluid, continuous forms. The internal 3D-printed structure makes each module lightweight and easy to reconfigure.
