

K_LINE

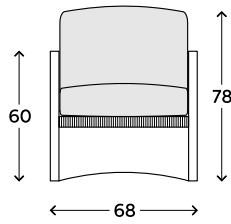

K_LINE interpreta il dialogo tra struttura e comfort attraverso un segno deciso e architettonico. La base in polimero stampato in 3D sostiene i volumi imbottiti, mentre i braccioli in legno massello diventano elemento strutturale e di appoggio. Il dettaglio circolare, cuore tecnico del progetto, definisce l'identità della collezione. Pensata per ambienti indoor e outdoor, K_LINE unisce solidità, leggerezza e riconoscibilità formale.

K_LINE explores the relationship between structure and comfort through a clear architectural language. The 3D-printed polymer base supports the upholstered volumes, while solid wood armrests become both structural elements and front supports. The circular joint, a technical core detail, defines the collection's identity. Designed for indoor and outdoor settings, K_LINE combines solidity, lightness, and strong visual recognition.
